Job description internship

Renewable energy in San Jose, Philippines

Background Let's Care Foundation

Let's Care Foundation is committed to creating a more beautiful world by carrying out social projects in the Philippines. We run a rehabilitation program for abused girls, an educational project for street boys, and an eco farm. To make this happen, we work closely with various local authorities and organizations. We are working towards financial independence in order to secure the sustainability and future for our various projects.

Internship in San Jose

We work closely together with the local government in San Jose. The Municipal Environmental Department would like to know what the affect is of the current energy sources that are being used and what new opportunities are for renewable energy sources in San Jose. This is a major study involving research inventory and is a suitable project for more than one student over an extended period of time.

Activities and research

You will conduct research on the energy sources that are currently being used and how this affects the environment and the people. You can address the following questions during your internship:

- Which (renewable) energy sources are currently being used and how does this affect the environment?
- Which renewable energy sources are available?
- How does the use of these renewable energy sources affect the environment and the local people?
- How much does it cost to invest in these renewable energy sources?
- How could this be implemented?

Supervision

You will report to the head of the Municipal Environmental Department who will supervise you during your internship. There will also be a supervisor from Let's Care in San Jose.

Who are we looking for?

We are looking for one or two students with a relevant background who will come up with an assessment report including recommendations that could be implemented.
