# Job description internship

## Research soil and water quality in San Jose, Philippines

### **Background Let's Care Foundation**

Let's Care Foundation is committed to creating a more beautiful world by carrying out social projects in the Philippines. We run a rehabilitation program for abused girls, an educational project for street boys, and an eco farm. To make this happen, we work closely with various local authorities and organizations. We are working towards financial independence in order to secure the sustainability and future for our various projects.

### **Internship in San Jose**

We work closely together with the local government in San Jose and Antique province. The Agricultural Department would like our help to assess the current way of farming and to research possibilities for ecological farming and horticulture in Antique province. This is a major study involving research inventory and is a suitable project for more than one student over an extended period of time.

### **Activities and research**

This is research that involves an inventory of the current quality of agricultural soil and water, how this affects the environment and how we could implement biological agriculture and horticulture. You can address the following research questions during your internship:

- To what extent is biological agriculture and horticulture already implemented?
- What is the current quality of agricultural soil and water in Antique province?
- How does this affect the local people and their environment?
- In which areas are crops grown without the use of pesticides? Is there a different water and soil quality?
- What can be done to improve the quality of water and soil?

### **Supervision**

You will report to the Provincial Department of Agriculture who will supervise you during your internship. There will also be a supervisor from Let's Care in San Jose.

### **Who are we looking for?**

We are looking for one or two students with a relevant background who will come up with an assessment report including recommendations that could be implemented.
