

Job description internship Urban planning and development

Education: Spatial and environmental planning

Location: San Jose, Antique, Philippines

Time frame: 3 months

The Municipal Planning and Development Office is a local government unit that is concerned with everything related to the spatial layout for the city of San Jose de Buenavista. In order to do this properly, the municipality has previously commissioned a small team of consultants trained by the University of the Philippines to come up with a Comprehensive Land Use Plan. For its geographical mapping, the local government needs properly digitized maps.

ACTIVITIES

Based on the information that is gathered you will digitize maps for the municipality of San Jose. You will come up with a plan of action and discuss the results with the local coordinator.

REQUIREMENTS

- You have a relevant educational background
- You have experience working with ArcView or equivalent software
- You are flexible, patient and proactive

Job description internship

Urban planning and development in San Jose, Philippines

Background Let's Care Foundation

Let's Care Foundation is committed to creating a more beautiful world by carrying out social projects in the Philippines. We run a rehabilitation program for abused girls, an educational project for street boys, and an eco farm. To make this happen, we work closely with various local authorities and organizations. We are working towards financial independence in order to secure the sustainability and future for our various projects.

Internship in San Jose

We work closely together with the local government in San Jose. The Municipal Planning and Development Office (MPDO) needs help with a particular technical task. This local government unit is concerned with everything related to the spatial layout for San Jose de Buenavista. In order to do this properly the municipality has previously commissioned a small team of consultants trained by the University of the Philippines to come up with what is called a Comprehensive Land Use Plan (CLUP). For its geographical mapping, the MPDO needs properly digitized maps.

Activities

This is not a research project, but more a hands on project where the data that is gathered and put together in the CLUP needs to be digitized. However, recommendations based on the current land use plan are always welcome. You can address the following questions during your internship:

- What plan of action do you propose and how is this perceived by the MPDO coordinator?
- Based on the information gathered in the CLUP report, do you have any recommendations?
- What challenges did you encounter in the actual programming; how did you deal with this?
- In presenting your results, how was this received by the MPDO?

Supervision

You will report to the MPDO coordinator, Engr. Jose Magbanua who will supervise you during your internship. There will also be a supervisor from Let's Care in San Jose.

Who are we looking for?

We are looking for a student with an interest and experience in ArcView or an equivalent software.
